About the conference

In today's globally competitive arena, Statistics is an essential tool for navigating uncertainty, turning data into a strategic asset, and driving growth. From tracking epidemics to modeling economies, it reveals hidden patterns and generates the crucial insights for a competitive edge. Our conference aims to harness this power by interdisciplinary collaboration between statisticians, data scientists, and industry leaders to solve pressing challenges.

Through this interdisciplinary platform, the conference aims to advance methodological innovation strengthen data-driven decision-making, and promote the integration of statistical science in addressing national and global challenges.

Theme

The conference will deliver focused statistical insights in the following key areas:

- **Finance**
- **Reliability engineering**
- **Clinical studies**
- **Genomics**
- **Methodology**
